

Bridge O-11 Replacement & Crawfords Circle Conversion

Borough of Interlaken, Village of Loch Harbor | Monmouth County, NJ

Van Cleef provided On-Call design services to Monmouth County for improvements to the replacement of Bridge O-11. Crawfords Circle was also reconstructed and replaced with a modern landscaped roundabout to enhance aesthetics, traffic calming and safety. The intersection to the north was also reconstructed to improve geometrics and safety. The overall project involved survey and mapping, ROW documentation, horizontal & geometric design, roundabout design, grading design, landscaping and lighting design, utility relocation, design of ADA curb ramps, maintenance and protection of traffic design involving detours and temporary pedestrian bridge, drainage design, guide rail design, bulkhead design, and design of a new bridge. The project was constructed adjacent to an at-grade NJ Transit railroad crossing, requiring coordination with, and approvals, by NJ Transit.
