

Doylestown Country Club

Township of Doylestown | Bucks County, PA

Van Cleef was contracted to provide comprehensive site design services for the Doylestown Country Club's Building Expansion and Parking Lot Facility project. The approximately 115-acre property, located in Doylestown Township with primary access from Green Street (Pebble Hill Road), required coordinated engineering and planning expertise. Van Cleef delivered a full suite of services, including a partial topographic survey, site layout and design, land development plans, erosion and sedimentation control plans, and post-construction stormwater management design. Our team also provided NPDES permitting support along with site lighting and landscape architectural services. This integrated approach ensured a compliant, efficient, and visually cohesive design that supports the Club's long-term vision.
