

First Commonwealth Credit Union Carbon Plaza

Township of Mahoning | Carbon County, PA

Van Cleef was selected to provide design services for a 2,300-square-foot financial center that stands out for delivering a full suite of essential banking services within a compact footprint, seamlessly integrated into an existing retail environment. Designed to support First Commonwealth's people-first banking experience, the facility emphasizes accessibility, modern technology, and personalized service. Sustainability was advanced through the redevelopment of an underutilized site and the implementation of a carefully engineered stormwater management system that reduced site impacts and long-term maintenance needs. The project reflects a meaningful investment in expanding access to financial services within a historically underserved community.
